Projects

PharmaChain | *React, Spring Boot 3, PostgreSQL, Spring AI, Docker*

GitHub

- Engineered a full-stack pharmaceutical supply chain platform using **React/TypeScript** and a **Spring Boot 3 REST API**, leveraging **PostgreSQL** triggers to enforce strict FDA-style drug compliance.
- Secured endpoints via **JWT authentication** (5-role RBAC) with compliant e-signatures; engineered an append-only **SHA-256 cryptographic audit ledger** to ensure immutable record-keeping.
- Developed a **Spring AI compliance copilot** combining **RAG** (via **pgvector** & **Ollama**) for regulatory documents with **Groq LLM tool-calling** to enable natural language querying of live inventory data.
- Integrated **IoT cold-chain telemetry** for real-time monitoring, and validated database logic using **Testcontainers** with CI/CD pipelines managed via **GitHub Actions** and **Docker**.

Classic Tetris Game | *C++, Object-Oriented Programming, Data Structures*

GitHub

- Built a fully playable, terminal-based Tetris game in **C++** applying core **OOP concepts** with clean classes for game state and falling blocks.
- Implemented real-time keyboard controls, **2D piece rotation**, collision detection, line clearing, and live scoring.

CodeMentor-PRO | *Python, LangChain, Groq, Gradio*

GitHub | Demo

- Built an AI code explainer that adapts to skill level (beginner/intermediate/expert) using **Groq-hosted LLMs** via **LangChain** for structured, line-by-line reasoning.
- Deployed an interactive **Gradio** interface on **Hugging Face Spaces** for real-time, adjustable-depth explanations.
